### **DETAILED ACTION**

Claims 1-23 are pending and subject to restriction requirement.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 21-23, drawn to a semen extender composition with non-animal derived ingredients and method of making the composition by mixing ingredients, classified in class 435, subclass 404, for example.
- II. Claims 15-20, drawn to a method for freezing and thawing semen, classified in class 435, subclass 374, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for freezing and thawing semen as claimed can be practiced with another materially different semen extender products, for example: freezing and thawing semen with plant derived polysaccharide containing semen extender taught by US 6,140,121 (col. 26-27, example 6).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and as shown by their different classification and because the search required for one groups is not required for another group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
